

ELEVATION BANNER

OUR ELECTRIC BANNER
SYSTEM FOR EASY
REPLACEMENT OF
INDOOR AND OUTDOOR
BANNERS

voigtTM

A BANNER CHANGE IS THIS EASY

1 The current banner mounted on the wall needs replacement.

2 It is lowered by remote control, and replaced from the ground.

3 A new banner is elevated and stretched automatically.

ELEVATION BANNER

This system makes it very easy for you to mount and replace a banner. Other systems require a mechanical lift to replace banners of similar sizes for safety reasons. With ELEVATION BANNER you can do it all on your own from the ground in no time.

- ⦿ Replacing a banner becomes a one-man operation
- ⦿ Neither ladder nor tools are needed
- ⦿ Remote controlled
- ⦿ Operated from the ground, very safe

- Why wait so long to replace banners that your message has become outmoded, when it can easily be done with ELEVATION BANNER

Download Brochure

You can download our open InDesign files, which are ready for you to insert your logo or use as your own material - scan or click on the QR code

INDOOR & OUTDOOR

The system can be used both indoors and outdoors, all parts are weather resistant.

When changing a banner

- ⦿ Operated by one person without use of lift or ladder
- ⦿ Easy banner replacement
- ⦿ The banner is elevated up and down by remote control
- ⦿ The motor automatically pulls the newly-mounted banner tight

- It's that easy

ELEVATION BANNER MOUNTED UP HIGH

With its tough wheels on the bottom rail, this system can be placed on every surface of a building. The bottom rail moves up and down and the whole banner can therefore be elevated high up and later lowered to the ground level for comfortable replacement. With the built-in Somfy high-quality motor, it is a unique solution which saves a lot of money (you do not need to rent a lift), as well as increases safety.

- ⊙ Quick replacement of banners at ground level
- ⊙ Remote controlled
- ⊙ Side mounting with wheels and strong elastic fastening
- ⊙ Movable bottom rail that is elevated

Specifications

Maximum width 20 m
Maximum height 15 m

Accessories

Cover box
Possibility of ral painting

ELEVATION BANNER MOUNTED DOWN LOW

This banner system makes it easy to exchange messages. The unique Elevation system with the built-in high-quality Somfy motor makes it possible to stand on the ground and change a banner. A fixed rail is mounted at the bottom. The motor has the function "Torque pull" which additionally tightens the banner. On each side, the banner has side guides with wheels and strong elastic rubber fasteners to ensure that the banner remains tight and resistant to the wind.

- ⦿ Quick replacement of banners at ground level
- ⦿ Remote controlled
- ⦿ Side mounting with wheels and strong elastic fastening

Specifications

Maximum width 20 m
Maximum height 15 m

Accessories

Cover box
Possibility of ral painting

ELEVATION BANNER INDOOR

Banner system for indoor banners. Optimal for all indoor locations where you need to be able to replace your banner / message without the use of a lift or a ladder.

Easy for one person to replace messages, with both legs firmly planted on the ground.

Can be used for free-hanging banners or against a wall.

- ⊙ Quick replacement of banners at ground level
- ⊙ Remote controlled
- ⊙ Possibility of installation on tall buildings
- ⊙ Ceiling / or wall mounting

Specifications

Maximum width 6 m

Maximum height 15 m

Accessories

Cover box

Possibility of ral painting

ELEVATION BANNER MANUEL

It is the same system and with the same features as “Elevation banner Mounted Low” This manual system is a cheaper alternative, which is without a motor and uses a manual hoisting system.

Recommended for banners up to 4m in width

- ⊙ Quick replacement of banners at ground level
- ⊙ Side mounting with wheels and strong elastic fastening

Specifications

Maximum width 4 m

Maximum height 10 m

Accessories

Cover box

Possibility of ral painting
