Foldable Smart Frame Display

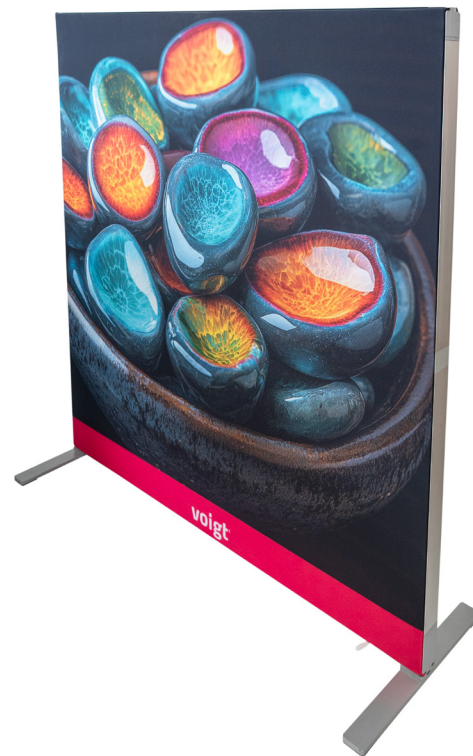

Mega Plus is a compact and modern SEG (Silicone Edge Graphics) display system, combining lightweight construction, tool-free setup, and a clean, professional appearance. Available in two practical sizes – 100x200 cm and 150x200 cm – with integrated feet and packed in a padded transport bag.

This system is perfect for trade shows, events, presentations, and retail spaces. It can be set up and packed down in just minutes, making it highly mobile and user-friendly.

Mega Plus 100x200 cm

Includes: foldable frame, feet,
SEG graphic, padded transport
bag

Mega Plus 150x200 cm

Includes: foldable frame, feet,
SEG graphic, padded transport
bag

Why it matters?

The **SEG graphic** fits perfectly within the frame thanks to a silicone edge that creates a seamless, wrinkle-free look. Combined with sublimation printing ensures sharp, vibrant visuals with intense color depth. It's durable and perfectly fitted — ideal for high-end branding and frequent use.

Single or Double-Sided Graphics

The system supports both single- and double-sided graphics, offering versatility for various display applications. Recommended fabrics include Decotex 205 for standard use and Decotex 260 / Blockout for applications requiring full opacity.

Foldable Frame

Designed for convenience, the Mega Plus frame folds down into a compact format, making it exceptionally easy to transport and store. The collapsible, lightweight aluminum construction ensures quick handling without compromising stability or durability.

New printing technology – more possibilities!
